

## GP File Maintenance

Data corruption happens. Network disconnections, power failures, crashes, and bad data imports can all interfere with the integrity of your accounting data. The effects of data corruption can range from critical system errors to unnoticeable.

## Virtual desktops in Azure for remote office workers. More secure than a home PC when working remotely.

While it may not be crystal clear how many employees might wind up permanently working from home, it's apparent there will be a lot more than there were prior to the pandemic.

## Dynamics GP - Quick Tip

Finding Customer for Invoice

This is a great tip for Cash Receipts! Have you ever received a payment and the invoice number noted with that payment does not match the person/company who paid the invoice?
