

Quick Tip Tuesday

Entering Dates

Did you know that a GP date field only requires you to enter in the day of the month that you are in and GP will take care of the rest? For example if you want to post on September 01, 2018, you only have to enter "1", press tab, and GP will populate 09/01/2018. The month and the year will **automatically** populate based on your GP User Date. A 90% reduction in keystrokes!

Have a quick tip you would like to share?

GP Tech Conference 2018

Every year for the last number of years **Microsoft** has been hosting GP partners at their Fargo campus for a few days of learning and networking with fellow GP partners. This conference usually takes place in late summer early fall. Prophet sent a number of software consultants again this year. This conference gives us a chance to learn what is new to Dynamics GP and other related software.

Prepare for SQL Server 2008 end of support

On July 9, 2019, support for **SQL Server 2008** and 2008 R2 will end. That means the end of regular security updates. Don't let your infrastructure and applications go unprotected. We're here to help you migrate to current versions for greater security, performance and innovation.

End of Life [SQL Server 2008](#)

Dynamics User Group 2018

It's that time of year and our annual Dynamics User Group is just around the corner.

Our Prophet team, along with our GP sponsors will be offering a full day of concurrent sessions to share tips, tricks and advice for getting the most out of your technology investment.
