

Are you ready? Exchange Server 2010 End of Life (EOL) is just around the corner

It's time to make a move!

In October 2020, Microsoft is ending support for Exchange Server 2010. Now is the time to upgrade to enterprise-class cloud services.

Staying with Exchange 2010 poses significant business risks and costs

- ✗ Obsolete technology
- ✗ Increased risk of security breaches and cyberattacks
- ✗ Higher overhead costs - requires hardware and ongoing maintenance
- ✗ Risk of downtime and productivity loss from server failure
- ✗ Unsupported by Microsoft

Moving to Office 365 enables unparalleled productivity and savings

Much of your business's intellectual property resides in email, and the collaboration features inherent in Office 365 are a great way to unleash your business to run at the speed of the cloud.

- ✓ Always the latest technology, security, features, and experience
- ✓ Reduced costs - no hardware to maintain
- ✓ Powerful collaboration and productivity capabilities accessible anytime, anywhere

EOL

What does 'End of Life' mean?

A typical Microsoft product lifecycle lasts 10 years from the date of the product's initial release, and the end of this lifecycle is known as the product's end of support, in which Microsoft will no longer provide:

- Bug fixes for stability/usability problems
- Security fixes
- Technical support

33 hrs

Time spent by SMB owners every month on admin tasks¹

Moving to Office 365 with us can free up leaders to focus on innovation and business agility.

21%

Higher profits when employees are highly engaged²

Office 365 is the most integrated productivity solution, empowering teamwork in the modern workplace.

43%

Cyberattacks targeting small business on-premises systems³
