

Disinfecting your Lenovo Device

Keeping your Lenovo device clean is easy. Start with clean hands. Remove any debris (crumbs, etc) by gently turning upside down or blowing with compressed air. Then use an approved disinfecting cleaner. A microfiber or lens cloth can be used to remove any remaining residue from the display

Cleaning “Active Ingredients”

Best

Isopropyl Alcohol (for example: PDI Super Sani cloth)

Good

Hydrogen Peroxide (for example: Accel wipes)
Ammonium compounds (for example: Lysol wipes)

NEVER

Chlorine or Bleach
